

## Subject: Crossing the Covid-19 period

---

Dear Members of NMEu,  
Colleagues and Friends of the nuclear medicine community,

In these turbulent times, we are aware of the safety measures to be taken at all levels in conformity to the recommendations of national and international public health authorities. We are particularly careful not to endanger the health and safety of our members and their representatives within NMEu.

We decided that all future meetings will be held by video/teleconferences. Certain meetings will be cancelled and communicated to you in due time.

In parallel we continue to keep in touch with our different member companies: we transmit any message likely to interest our community, concerning the continuity of the services that our members are required to render for the benefit of the patients.

Our central administration office in Brussels (Jocelyne and David) works from home and remains at your disposal to circulate any information necessary for the continuity of our activities.

The **NMEu Executive Committee** takes this opportunity to express their gratitude to the **SoS (Security of Supply) and Transport Experts working groups** for their availability and sense of solidarity to working together within the **Emergency Response Team** to ensure the security of the supply of radioisotopes and their deliveries to hospitals worldwide.

Let's take this time of difficulties as a challenge to give our motto *"working together to pave the way to the best sustainable healthcare model in nuclear medicine"* all its reality.

**Stay safe !**

**The NMEu Executive Committee**
